

HEADS OF AGREEMENT FOR COOPERATION BETWEEN THE UNITED STATES DEPARTMENT OF ENERGY AND THE UNITED KINGDOM DEPARTMENT OF TRADE AND INDUSTRY ON THEIR RESPECTIVE PROGRAMMES FOR NUCLEAR CLEAN-UP

The United States Department of Energy (USDoE) and United Kingdom Department of Trade and Industry (UKDTI) have similar issues associated with their programmes for nuclear decommissioning and clean-up.

In recognition of these similarities, USDoE and UKDTI agree to exchange information on these nuclear programmes and to explore and promote means by which each party can benefit from the other's respective expertise.

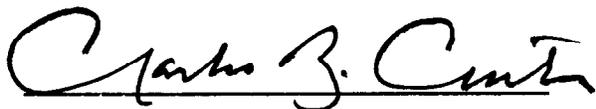

There shall be no obligation on either USDoE or UKDTI to provide any information which is considered to be of commercial value or sensitivity.

If either party decides to supply such information, this supply shall be subject to any reasonable restrictions it wishes to impose.

The exchange will initially involve a comparison of selected management processes and of similar projects.

An outline programme of work for these exchanges is attached.

Following completion of this initial programme, USDoE and UKDTI will jointly consider what further cooperation should be undertaken.
